

ARMAN GHAZIASKARI

Senior GIS & GeoAI Specialist with 20+ years of experience delivering geospatial solutions for urban planning, spatial analysis and decision support systems. Recently expanded my expertise into Python, Machine Learning and GeoAI, developing end-to-end geospatial AI solutions. Built a GeoAI platform for the Greater Bilbao Metropolitan Area integrating geospatial data, predictive analytics and interactive dashboards to support data-driven urban decision-making. Seeking opportunities in GeoAI, Spatial Data Science, Smart Cities and digital transformation.

📍 48014, Bilbao

SKILLS

CORE EXPERTISE: GIS, GeoAI, Spatial Data Science, Urban Analytics, Territorial Planning, Remote Sensing, Machine Learning

PROGRAMMING: Python, Pandas, GeoPandas, NumPy, Scikit-learn, TensorFlow, SQL, React (basic), JavaScript (basic)

GIS & RS SOFTWARE: ArcGIS Pro, ArcGIS, QGIS, ENVI, ERDAS Imagine, Google Earth Engine

DATA & AI TOOLS: Power BI, Streamlit, SHAP, Git, GitHub, GitHub Actions, Docker

COLLABORATION: Jira, Notion

BIG DATA (Basic): Apache Spark (basic), Apache Kafka (basic), Hadoop Ecosystem (basic)

LANGUAGES

Spanish Upper Intermediate (B2)
English Upper Intermediate (B2)
Persian Native

Senior GIS & GeoAI Specialist

Spatial Data Science | Urban Analytics | AI-driven Decision Support

20+ years of GIS leadership and spatial analysis experience.

Integrated GIS, Machine Learning and Python into decision-support systems.

WORK EXPERIENCE

Independent Consultant — GIS & GeoAI

Freelance | 2021 – Present | Bilbao, Spain

- Developed independent GIS and GeoAI solutions while advancing expertise in Python, Machine Learning and Spatial Data Science.
- Designed and implemented an end-to-end GeoAI platform for the Greater Bilbao Metropolitan Area integrating **29,000+ environmental records**, **60+ engineered features**, and predictive machine learning models.
- Built automated ETL workflows, spatial feature engineering pipelines and interactive Streamlit dashboards.
- Applied geospatial analytics to urban and environmental datasets for decision-support applications.
- Collaborated on GIS and cartographic projects for private clients.

GIS Specialist & Manager

Office of the Governor General — Isfahan Province | 2004 – 2021 | Iran

- ▶ Led technical teams, supervised GIS specialists and coordinated cross-departmental geospatial initiatives.

Managed multidisciplinary GIS teams and coordinated spatial data initiatives across provincial government departments.

- ▶ Designed and implemented provincial spatial data infrastructure, including database design, governance and interdepartmental data exchange standards.
- ▶ Published and managed cartographic and geoprocessing services from ArcGIS Pro/Enterprise for web application consumption via REST services.
- ▶ Prepared technical proposals, project methodologies and RFP/RFQ documentation aligned with administrative and regulatory requirements.

Digitization Contributor

Brown University — Spatial Structures in Social Sciences | 2013 | USA

- ▶ Digitization of historical census maps (1890–1930) of US cities using GIS tools.

FEATURED PROJECT: GeoAI Platform for Urban Decision Support

Stack: Python, Scikit-learn, TensorFlow, GeoPandas, Folium, Streamlit, GitHub Actions.

White Paper: <https://doi.org/10.5281/zenodo.21492466>

ACADEMIC EDUCATION

MSc in Geographic Information Systems (GIS) and Remote Sensing

Shahid Beheshti University, Tehran, Iran | 2000 – 2004

BSc in Environmental Engineering — Watershed Management

Isfahan University of Technology, Iran | 1996 – 2000

ADDITIONAL TRAINING

- ▶ 2026 — LABORLAN 2026: AI & Data Tech: Artificial Intelligence and Technology Project Management (365h) — GAIA, DEMA, C2B, Bilbao
- ▶ 2026 — Big Data Specialist (230h) — Alfa formación, Bilbao
- ▶ 2025 — Artificial Intelligence Specialist (230h) — EDE Fundazioa, Bilbao
- ▶ 2024–2025 — Data Science Bootcamp (480h) — BBK Bootcamps, Bilbao
- ▶ 2025 — Front-End Web Development Bootcamp (200h) — BBK Bootcamps, Bilbao
