

ARMAN GHAZIASKARI

GIS Analyst | Data Scientist | GeoAI Specialist

GIS Specialist and Data Scientist with 20+ years of experience in geospatial analysis, remote sensing and data-driven solutions for urban and environmental planning. Combining classic GIS with Python, Machine Learning and interactive dashboards to build GeoAI platforms for decision-making.

Currently running a live GeoAI platform for air quality monitoring and forecasting across Greater Bilbao.

📍 48014, Bilbao

SKILLS

GIS & Geospatial: ArcGIS Pro/Enterprise, QGIS, GeoPandas, GEE, Web AppBuilder, REST Services, Remote Sensing

Data & Programming: Python (Pandas, NumPy, Scikit-learn, TensorFlow/PyTorch), SQL, ETL, Data Pipelines

Machine Learning: Random Forest, XGBoost, LSTM, Time Series, Environmental Predictive Analysis

Visualisation: Streamlit, Power BI, Folium, Matplotlib, Interactive Dashboards

Tools: Git, Docker, GitHub Actions, Jira, Notion

Additional Knowledge: Big Data concepts (Spark, Kafka, Hadoop – basic), JavaScript / React (basic)

LANGUAGES

Spanish (B2)
English (B2)
Persian (Native)

WORK EXPERIENCE

Independent Projects — GIS & GeoAI

Freelance | 2021 – Present | Bilbao, Spain

- ▶ Built a live GeoAI platform for air quality monitoring and forecasting in Greater Bilbao, integrating data from 7 stations, ML models (Random Forest, LSTM) and an interactive Streamlit dashboard with real-time maps.
- ▶ Conducted spatial land-use planning analysis (Amayesh) for a client in Iran: multi-layer spatial data integration and delivery of an analytical Power BI dashboard.
- ▶ Executed optimal park and playground location project using multi-criteria spatial analysis (GIS + Python), delivering a technical report with recommendations.
- ▶ Developed an air quality predictive model comparing algorithms (Random Forest, XGBoost, LSTM) and identifying the optimal model for environmental time series.

GIS Specialist & Manager

Office of the Governor General — Isfahan Province | 2004 – 2021 | Iran

- ▶ Led GIS projects for territorial planning and crisis response at provincial level, managing multidisciplinary teams and coordinating with stakeholders.
- ▶ Designed and implemented provincial spatial data infrastructure, including database design, governance and interdepartmental data exchange standards.
- ▶ Published and managed cartographic and geoprocessing services from ArcGIS Pro/Enterprise for web application consumption via REST services.
- ▶ Prepared technical proposals, project methodologies and RFP/RFQ documentation aligned with administrative and regulatory requirements.

Digitization Contributor

Brown University — Spatial Structures in Social Sciences | 2013 | USA

- ▶ Digitization of historical census maps (1890–1930) of US cities using GIS tools.

FEATURED PROJECT: GeoAI Smart City Platform in Greater Bilbao

- ▶ Complete pipeline: 7 stations → ETL → Feature Engineering → ML models (Random Forest, XGBoost, LSTM) → live Streamlit dashboard with real-time maps and zone alerts.
- ▶ Stack: Python, Scikit-learn, TensorFlow, GeoPandas, Folium, Streamlit, GitHub Actions.

ACADEMIC EDUCATION

MSc in Geographic Information Systems (GIS) and Remote Sensing

Shahid Beheshti University, Tehran, Iran | 2000 – 2004

BSc in Environmental Engineering — Watershed Management

Isfahan University of Technology, Iran | 1996 – 2000

ADDITIONAL TRAINING

- ▶ 2026 — LABORLAN 2026: AI & Data Tech: Artificial Intelligence and Technology Project Management (365h) — GAIA, Bilbao
- ▶ 2026 — Big Data Specialist (230h) — Bilbao
- ▶ 2025 — Artificial Intelligence Specialist (230h) — Bilbao
- ▶ 2024–2025 — Data Science Bootcamp (480h) — Bilbao
- ▶ 2025 — Front-End Web Development Bootcamp (200h) — Bilbao
